

M86 SMB Security Suite

Enterprise-class Web and Email Security at a Price to Fit Any Budget

M86 SMB Security Suite is a collection of full-featured, enterprise-class Web and email gateway security solutions that is priced for organizations with 500 users or less.

COMPONENTS

The M86 SMB Security Suite includes full versions of the following solutions:

M86 WebMarshal

Web security gateway provides precise policy control over Web 2.0 and social media to maintain productivity, enforce AUPs and prevent data loss.

M86 Filter List

Award-winning URL database of 100+ categories provides maximum productivity and content control.

MailMarshal Secure Email Gateway (SEG)

Email content security gateway provides total visibility into all email content, including within attachments, so businesses can enforce policies, protect data and prevent threats.

Marshal Reporting Console (MRC)

Browser-based console offers reports for security and compliance. Provides robust reporting features such as scheduling, auto-email delivery and a range of output formats including PDF and HTML.

Anti-malware

Leading anti-malware engines protect against viruses, Trojans, worms and spyware.

BENEFITS

- Protection from Internet-, and email-based threats
- Web 2.0 access and management
- Data loss prevention (DLP)
- Centralized, robust management and reporting
- Bandwidth consumption and control
- Regulatory and AUP compliance
- Low cost, high-value solution
- Flexible deployment options

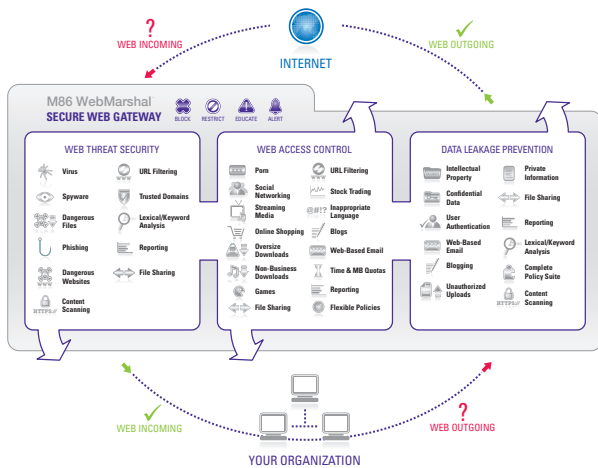

OPTIONAL ADD-ON MODULES

M86 Blended Threat Module

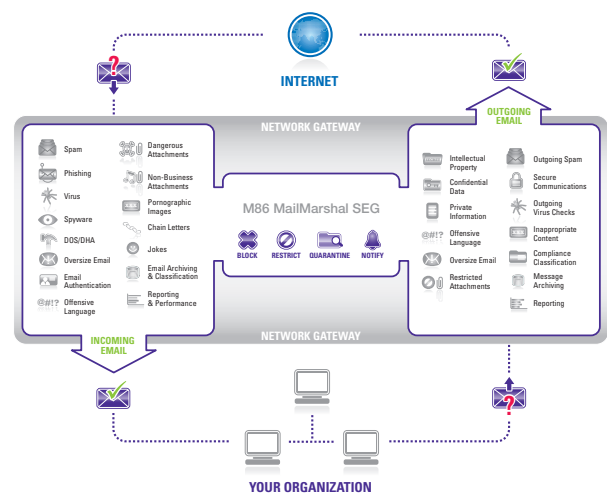

A unique solution that protects from advanced threats that originate through email and spread via the Web.

Image Analyzer

Scans and recognizes inappropriate images entering your organization via email.

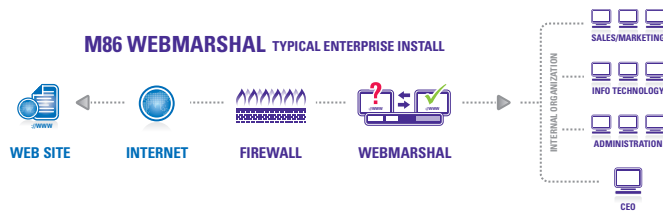

M86 WebMarshal Secure Web Gateway

MailMarshal Secure Email Gateway (SEG)

DEPLOYMENT

WebMarshal

M86 WebMarshal acts as a Secure Web Gateway and is typically deployed between a network firewall and the trusted internal network. From here, M86 WebMarshal can analyze Web requests and control what content is downloaded or uploaded to the Web as well as caching content for efficiency.

M86 WebMarshal deployment options:

- As a standalone proxy server
- Chained to another proxy on a physically separated server
- Chained to another proxy located on the same server
- In an array with multiple, distributed M86 WebMarshal content processing nodes reporting to, and managed by a centralized administration console
- Installed as an ISAPI Filter integrated into Microsoft ISA Server

M86 MailMarshal SEG Typical Enterprise Install

MailMarshal Secure Email Gateway (SEG)

MailMarshal SEG is designed to be deployed as the first receiving email gateway in an organization. It is typically deployed in the DMZ between the network firewall and the trusted internal network. **In typical deployments, M86 MailMarshal acts as the email gateway.**

M86 MailMarshal SEG deployment options:

- M86 MailMarshal SEG can be deployed in a standalone configuration with database logging and the administration console located within the trusted environment.
- M86 MailMarshal is also specifically designed to support multiple distributed mail processing servers configured in an array. The array is managed centrally by the MailMarshal Array Manager which can control and manage multiple nodes. Administration can be performed locally or remotely via the M86 MailMarshal Web Console.

TRY BEFORE YOU BUY

M86 Security provides a free “try before you buy” offer for M86 SMB Security Suite. Download and trial the Suite free for 30 days at www.m86security.com/products/security_suite/m86-smb-security-suite.asp

The trial includes M86 MailMarshal SEG, M86 WebMarshal, M86 Marshal Reporting Console (MRC) and both Sophos for Marshal and Norman Virus Control for Marshal. To ensure maximum flexibility, these products can be downloaded separately for installation in the most appropriate location.

ABOUT M86 SECURITY

M86 Security is the global expert in real-time threat protection and the industry’s leading Secure Web Gateway provider. The company’s appliance, software, and Software as a Service (SaaS) solutions for Web and email security protect more than 25,000 customers and 26 million users worldwide. M86 products use patented real-time code analysis and behavior-based malware detection technologies as well as threat intelligence from M86 Security Labs to protect networks against new and advanced threats, secure confidential information, and ensure regulatory compliance. The company is based in Irvine, California with international headquarters in London and development centers in California, Israel, and New Zealand.
